PROFILE

Full Stack Developer with 1.5+ years of experience building **production-ready web applications** using **React / Next.js** and **Node.js / NestJS**. **Delivered 2 end-to-end projects** from architecture to deployment, including real-time scheduling systems and **API integrations**. Focused on scalable backend design, performance optimization, and reliable third-party integrations.

TECHNICAL SKILLS

Frontend	Backend	DevOps / Cloud	Tools
JavaScript / HTML5 / CSS3	Node.js / Express / Nest.js	Docker	Git / GitHub
React / Next.js	PostgreSQL	AWS	Figma
TypeScript	GraphQL / REST	CI/CD / GitHub Actions	Jira / Linear (Agile / Kanban)
Redux	MongoDB / Redis	Linux / Nginx	Jest
Tailwind CSS			AI Tools (Claude / Antigravity)

WORK EXPERIENCE

SoftServe 12 / 2024 - 03 / 2026

Fullstack developer

MVP: Team Meeting & Management Platform 04 / 2025 - 03 / 2026

A corporate service for planning and managing team meetings — meeting creation and scheduling, participant management, custom user roles, notifications and meeting.

Technologies: Next.js, TypeScript, Redux Toolkit, REST API, Tailwind, Nest.js, Redis, PostgreSQL, Jira, Git

- ❖ Developed responsive UI components and built fast client-side logic for meeting creation using Next.js and Tailwind
- ❖ Implemented interactive participant management and designed predictable state flow with TypeScript and Redux Toolkit
- ❖ Created reliable backend logic for custom user roles and wrote efficient services using Nest.js
- ❖ Integrated calendar services and connected Microsoft Graph API endpoints via REST API to seamlessly sync team schedules
- ❖ Handled database schemas for meeting history and optimized relational queries in PostgreSQL
- ❖ Troubleshoot API synchronization errors, reproduced scheduling edge cases, and fixed bugs promptly
- ❖ Understood technical requirements to estimate task scope, proposed practical solutions, and executed sprint planning within Jira
- ❖ Collaborated with the team, participated in code discussions, reviewed pull requests using Git, and fostered teamwork through clear communication

Key Achievement: Optimized Microsoft Graph provisioning workflows through parallel processing and bulk requests with status polling, reducing processing time for large operations by nearly 50%

Volunteering Platform Shveina rota 12 / 2024 - 04 / 2025

A web platform for onboarding and training volunteers — educational content delivery, user registration, volunteer coordination, custom admin panel, and secure authorization.

Technologies: Next.js, TypeScript, REST API, Nest.js, MySQL, Figma, Docker

- ❖ Built accessible educational modules and developed responsive UI components in Next.js and TypeScript, using Figma mockups to design pixel-perfect layouts
- ❖ Designed user registration workflows and implemented a custom admin panel to manage volunteers efficiently within the Next.js frontend
- ❖ Wrote scalable backend services for volunteer coordination and created secure authorization logic using Nest.js
- ❖ Connected specific data endpoints to the Nest.js backend via REST API and integrated the frontend application
- ❖ Handled relational database schemas in MySQL
- ❖ Diagnosed Nest.js backend edge cases, troubleshoot system errors, reproduced REST API bugs, and fixed them promptly to deploy stable updates
- ❖ Collaborated with project stakeholders, participated in feature discussions, reviewed requirements, and maintained clear communication

Key Achievement: Successfully executed the project from scratch to full production release as the Full Stack Developer, independently designing, building, and deploying the entire architecture.

Freelance 06 / 2024 - 12 / 2024

Full Stack Developer

As a Full Stack Developer, contributed to 5+ projects — developing and extending UI components, building lightweight backend features, and integrating third-party APIs.

Technologies: *JavaScript, HTML5, CSS3, React, Node.js, Express.js, MongoDB, REST API, Figma*

- ❖ Developed and extended UI components and built responsive layouts using HTML5, CSS3 and JavaScript
- ❖ Designed UI layouts and created visual mockups in Figma before implementation
- ❖ Implemented pixel-perfect interfaces based on Figma mockups
- ❖ Built lightweight backend services and REST API endpoints using Node.js and Express.js
- ❖ Designed and managed document-based database schemas using MongoDB
- ❖ Integrated third-party REST APIs to automate data synchronization
- ❖ Resolved data inconsistency issues and fixed backend bugs

Key Achievement: Successfully integrated the Resales API into an Italian estate platform (Casavanwik) via Express.js, enabling automated synchronization of property listings and eliminating manual data updates

EDUCATION

Bachelor's degree · Software Engineering national Technical University "Dnipro Polytechnic"

[Advanced Full Stack with React.js](#) · SoftServe Academy · 2025

LANGUAGES

Ukrainian — Native

English — Upper-Intermediate (B2)
